Huntington Beach City School District
Huntington Beach, CA

DISTRICT TRANSFORMS CLASSROOMS INTO 21ST CENTURY LEARNING ENVIRONMENTS

- Focus on Student Development
- Variety of designs to meet student, teacher and administrator needs
- Community, district, and school alignment

Huntington Beach City School District partnered with OnPoint Innovative Learning Environments and created twelve innovative classroom designs demonstrating a variety of furniture and technology solutions. By using OnPoint's software, Progress Adviser, the district collected feedback from students, teachers, and school administrators. Utilizing this feedback, the remainder of the classrooms were designed with the students' and teachers' successes in mind. These additional environments included flexible seating options and collaborative technology to encourage student engagement and communication. Having completed three phases of implementation, Huntington Beach City Schools is on the way to transforming its classrooms district-wide into 21st Century Learning Environments.

> "When I go home each day I feel like I've done, not just a good job teaching, but like I'm really truly serving them at the level they deserve to be taught"
>

Innovative Learning Environments

“This change has motivated our teachers, engaged our community, and developed more options and outcomes for more students than we have ever been able to previously achieve.”

Gregg Haulk, HBCSD Superintendent
